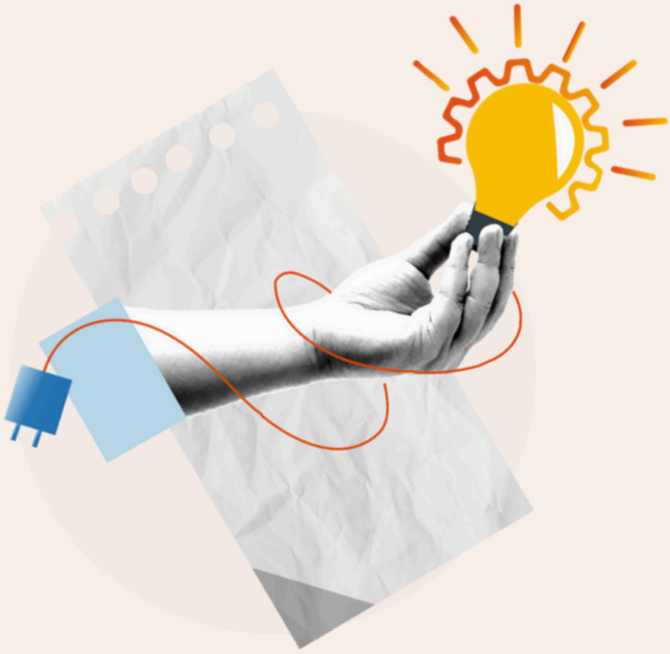
2buy2 energy basket

Smarter Energy Procurement

At 2buy2, we believe organisations should focus on progress, not complex energy contracts. That's why we offer an ethical, cost-effective and hassle-free energy solution.



Why an Energy Basket?

The 2buy2 energy basket combines the energy spend of multiple organisations into a single, larger volume of consumption. This collective buying power allows access to wholesale energy markets, that you don't get with traditional fixed-term contracts. While many organisations understand the benefits of purchasing energy through wholesale markets, they often lack the annual kWh volume to access these opportunities directly.

By pooling like-minded customers into a single group, we create sufficient volume to trade on wholesale energy markets using a risk-managed approach, delivering better value for everyone involved.

Who Is It For?

Our flexible energy baskets are designed for both half-hourly and standard metered customers with no minimum annual consumption requirements.

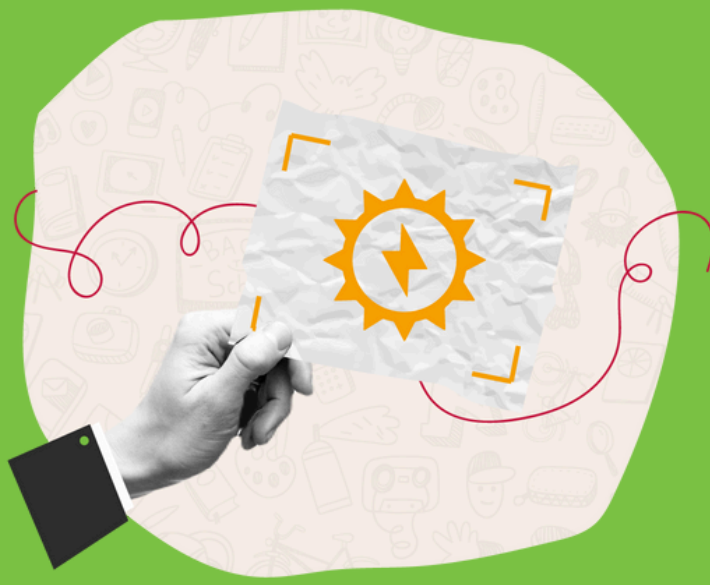
These organisations can gain access to wholesale energy markets without needing a bespoke flexible energy contract.

For organisations accustomed to fixed retail energy contracts, the basket offers a chance to benefit from wholesale market pricing while avoiding the complexities of managing individual purchasing decisions.

The Benefits

By pooling energy demand with other organisations, you gain:

- Greater buying power – access to wholesale energy rates.
- Hedged pricing - shielding you from market volatility, ensuring more stable and predictable costs by spreading energy purchases over time.
- Expert management – no need to negotiate contracts alone.



100% Green Energy: Supporting Your Sustainability Goals

The 2buy2 energy basket offers 100% green electricity as standard, helping you meet sustainability targets and reduce your carbon footprint. We also provide an option for 100% green gas (subject to availability), ensuring your entire energy consumption is from renewable sources.

Frequently Asked Energy Basket Questions

Why don't I know my pricing before signing up?
By joining the basket now, you won't know the final price until September. While this requires a level of trust, thousands of customers have benefited from long-term price stability, and our past basket had a 98% retention rate over 10 years!

The 2buy2 Energy Basket operates as a flexible procurement model, allowing us to secure the best possible prices based on market conditions. Each year on 1st October, you'll receive your pricing for the next 12 months, providing predictability and stability. Future prices will be determined based on market-driven energy purchases, ensuring ongoing cost optimisation.

How long does the basket last?
The Energy Basket is a 5-year agreement, starting on 1st October 2025 with a carefully selected supplier, ensuring long-term price security and expert contract management. You can join at any time, with the contract running until the end of the agreement - 30th September 2030.

Can I still use my preferred supplier?
The energy basket is awarded through a competitive tender process to ensure best value and service. While you may not be able to choose your exact supplier, the selected provider meets strict quality and compliance standards, giving you confidence in your energy contract.

What happens if I need to leave the basket early?
We understand that needs change. You can exit the basket early by giving notice before 1st April 2028. Your contract will then end on 30th September 2028. This provides flexibility while maintaining the benefits of a long-term strategy.

What if my current energy contract ends before October 2025?
No problem! We offer interim contracts to cover any gaps, ensuring you have a seamless transition into the energy basket without being tied to an expensive short-term deal.

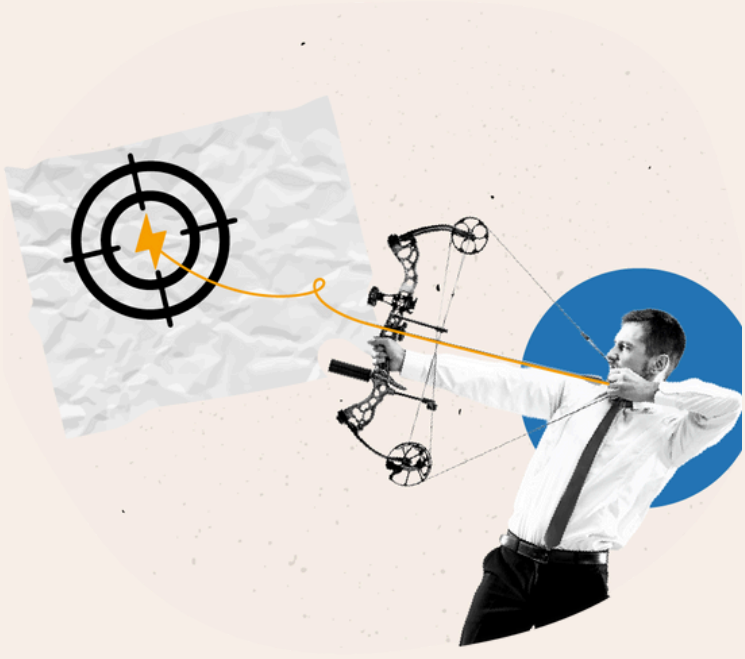
Your Energy, Your Future – Secured!

2buy2's Energy Basket is designed to overcome the biggest challenges in energy procurement, offering transparency, flexibility and long-term support.

A Case Story

We developed a tailored church buying group to streamline indirect expenditures for churches across England and Wales, focusing on Power and Gas. As the official Energy Ombudsman-regulated broker, 2buy2 managed Energy Baskets and Fixed-Term contracts for the churches, ensuring price security through collective purchasing.

- **Starts October 2025** – Need cover before then? We offer interim contracts.
- **Transparent Pricing** – No hidden costs, just clear communication.
- **Expert Negotiation** – Competitive rates, tailored to your needs.
- **Sustainable Solutions** – Prioritising renewable energy for a greener future.
- **Flexible Participation** – Open to all organisations.
- **Ongoing Support** – Dedicated experts to guide you.



How It Works

Register Your Interest - Start by filling out the form. We'll get in touch to understand your organisation's energy needs, including your specific green energy requirements.

Sign a Letter of Authority (LOA)
Once signed, we can act on your behalf to gather your energy data and join your organisation to the Energy Basket.
